Nordic and exclusive interior design in real stone for decoration

HH LUX delivers flexible, exclusive slate solutions for professional construction and renovation projects. Also designed for architects and interior designers. Our slate enable exclusive interior applications – combining low weight, easy installation, and exceptional aesthetic value.

Our slate unites design, performance, and long-term durability, offering a contemporary material solution without compromising on quality or craftsmanship.

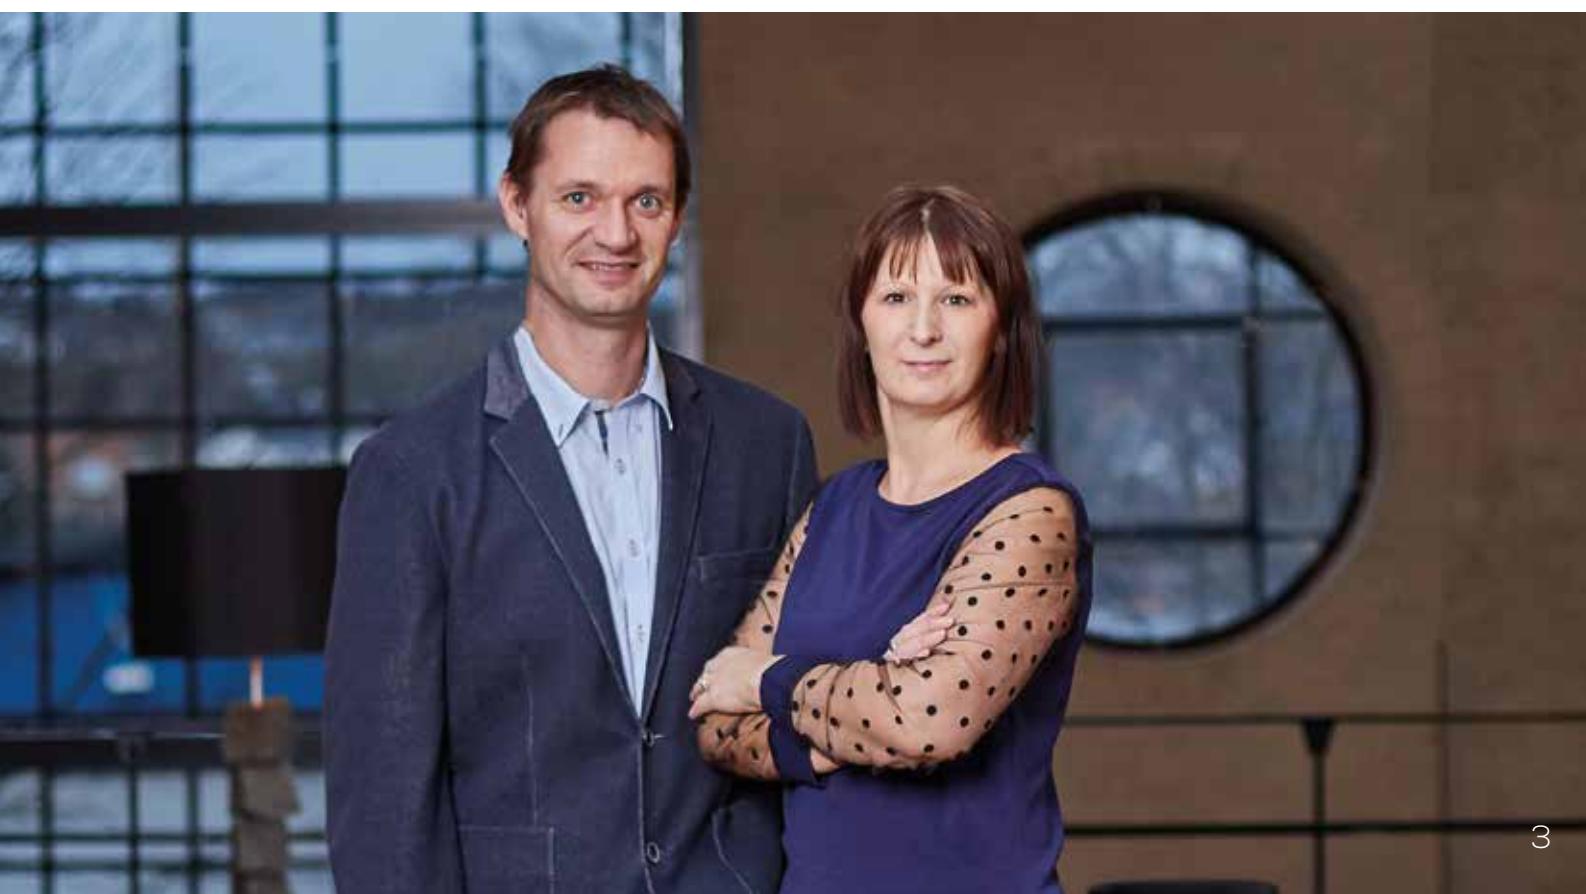

Perfect for both commercial, marine and private spaces.

We are deeply passionate about integrating nature into interior design in an ethical, sustainable, and timeless way, which is reflected in all of our products.

HH LUX create interior solutions with or without lighting that add a distinctive and aesthetic touch. Here we take the nature right into the room.

SLATE|LITE

The all-rounder

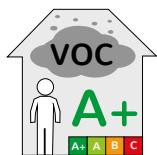

Customized lamps in innovative slate

Suitable for both interior and exterior applications ✓

Standard size 240 x 120 cm (2.88 m²) ✓

Sustainable with a low CO² footprintt ✓

DIN EN 15102:2011-12
DIN EN 15102:2008+A1:2011

Slate-Lite is a thin stone veneer with a fiberglass backing and a 100% natural stone surface. Despite its lightweight construction and a total thickness of only approximately 0,8-2,5 mm, it is extremely robust and durable.

Slate-Lite can be used both indoors and outdoors for wall cladding or as a backsplash in the kitchen. Even extraordinary living spaces made of stone in wet areas like bathrooms or showers are possible with Slate-Lite!

ULTRA|THIN
eco+

Flexible stone for curved shapes

- ✓ Can be installed directly on existing surfaces
- ✓ UV-, frost-, and temperature-resistant (-50° to +120°C)
- ✓ 1-2 mm thick, approx. 1.5 kg/m²

UltraThin eco+ is an extremely thin and flexible real stone decor with a cotton mat as its base.

Thanks to its lightweight and minimal use of natural stone resources, it offers an environmentally friendly solution with CO₂-efficient transportation.

The natural mat on the back enables easy processing and opens up many new possibilities for interior applications and furniture construction.

With UltraThin eco+, you can even master complex custom shapes and challenging edge areas!

The UltraThin eco+ we also use for our lampshades in HH LUX.

TRANSLUENT

Eye-catching with luminosity

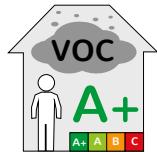

Different effects depending on the light source.

Variable sizes

Suitable for any light source

DIN EN 15102:2011-12
DIN EN 15102:2008+A1:2011

With our Translucent decors, we give the design a unique look, thanks to the transparent backing material on the backing!

Depending on the type of light used, different effects can be achieved: you can use both cold and warm, or even colored light to create your individual stone light object.

LIGHTBOARDS

LED panels in custom sizes with stone

The all-inclusive package with a guaranteed WOW effect.

Our Lightboards are custom-made LED panels with translucent stone.
It's a plug-in-play solution!

High-quality LED create stunning lighting effects, available in either colorful RGB lighting or warm/cool white lighting.

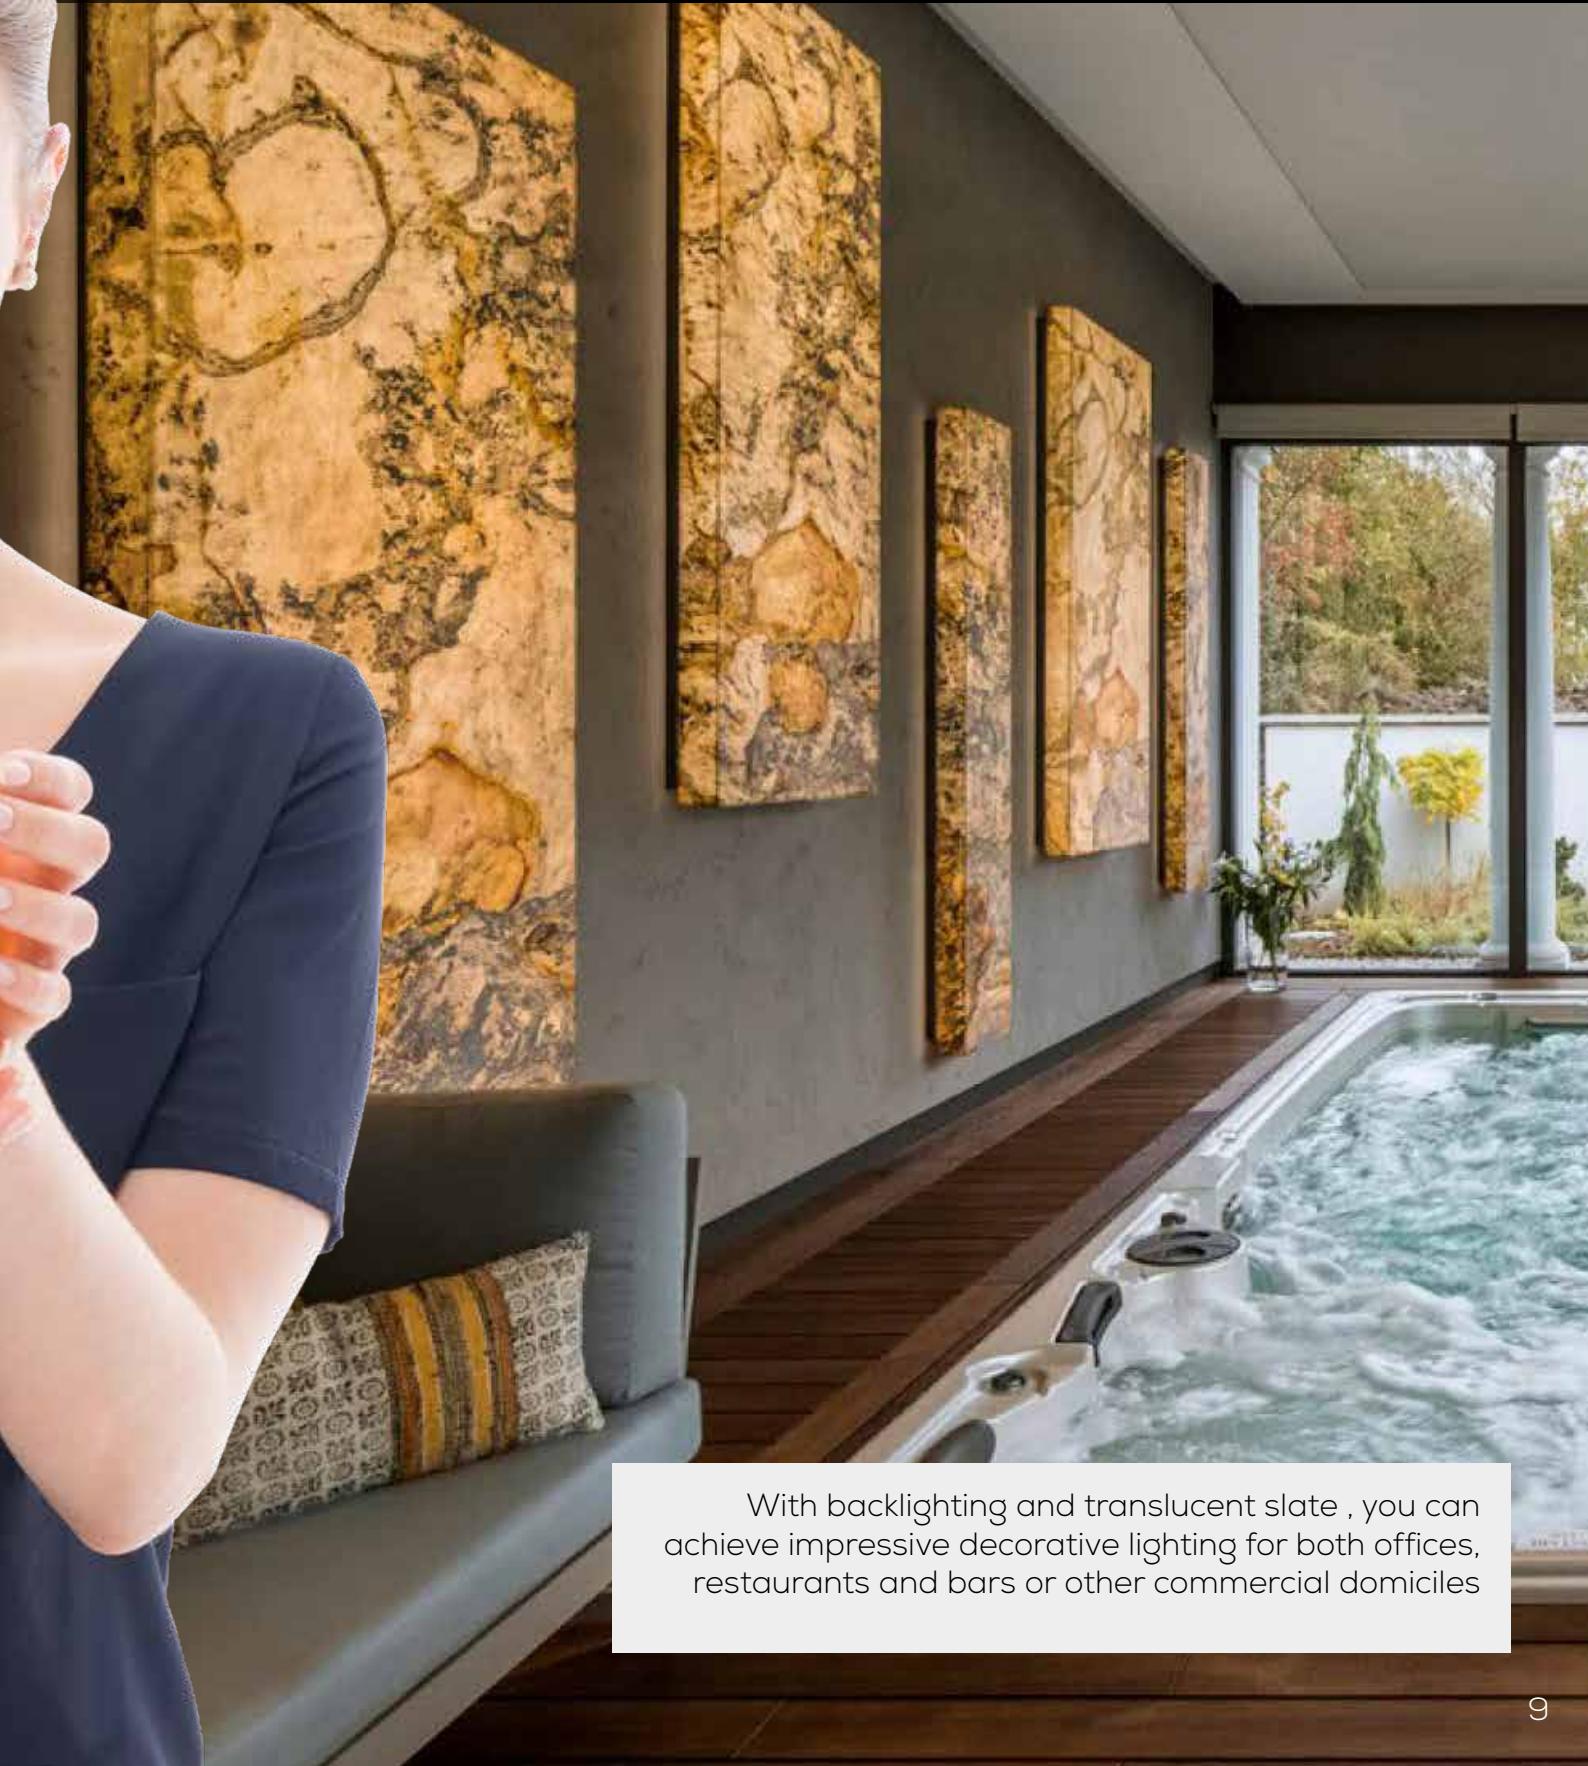

AMAZING LIGHT EFFECTS WITH BACKLITSTONE

- ✓ Different lighting effects possible
- ✓ Real stone in many colors for lighting
- ✓ Unique eye-catchers with lighting

TRANSLUCENT STONE

Create a beautiful wow-effect!

With backlighting and translucent slate , you can achieve impressive decorative lighting for both offices, restaurants and bars or other commercial domiciles

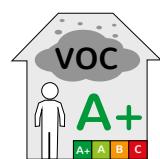

Slate-Lite is suitable for all types of wet areas, such as bathrooms and showers, as well as saunas and pool areas!

MADE OF

DREAM BATHROOM NATURAL STONE

- ✓ Installable directly onto old tiles
- ✓ Reduces seams in the room and can replace large-format tiles that are heavy to work with
- ✓ Waterproof, UV-resistant, and frost-resistant
- ✓ Standard size 240 x 120 cm (2.88 m²)

DIN EN 15102:2011-12
DIN EN 15102:2008-A1:2011

MODERN BATHROOM DESIGN

Stone Walls in Bathroom & Sauna

Quick & easy
RENOVATION

Transform the kitchen or buffet with beautiful, real stone that's both stunning and easy to work with.

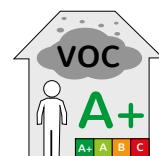

Upgrade your backsplash, kitchen walls, lighting, or fronts with the finest materials.

Elevate the space and invite the natural beauty of stone into your home.

Slate can even be placed directly over old tiles for a quick and seamless update.

MODERN KITCHEN DESIGN WITH REAL NATURAL STONE

- ✓ Can be installed directly over old tiles
- ✓ Customized to your desired dimensions
- ✓ Durable & easy to maintain
- ✓ Sustainable with a low CO² footprint
- ✓ VOC- and CE-certified

DIN EN 15102:2011-12
DIN EN 15102:2008+A1:2011

TRANSFORM THE KITCHEN OR BUFFET
Flexible and made of real stone

- ✓ UV-resistant & frost-proof
- ✓ More robust than raw stone slabs
- ✓ Sustainable solution with an expected service life of 50+ years

Slate-Lite can easily be glued as a final layer in an external thermal insulation composite system on the facade!

The basic structure must be breathable

Slate is mounted on the outside on breathable material.

Manufactured from real slate with a thin fiberglass backing that make the stone robust and flexible.

The material is only 1–2 mm thick with a surface weight of approximately 1.5 kg/m², ensuring minimal structural load and easy handling on site.

OUTDOOR AREAS & FACADES

Robust & elegant!

Slate-Lite is also perfect for modern architecture in outdoor areas!

The easiest way to achieve the dream facade is to use the current facade. Just make sure that the basic structure must be breathable.

Here you simply adhere our frost-resistant slate as the last layer without any further changes!

- ✓ Heat resistant up to 120°C
- ✓ Fire class up to Cs3d0
- ✓ Robust & easy to maintain

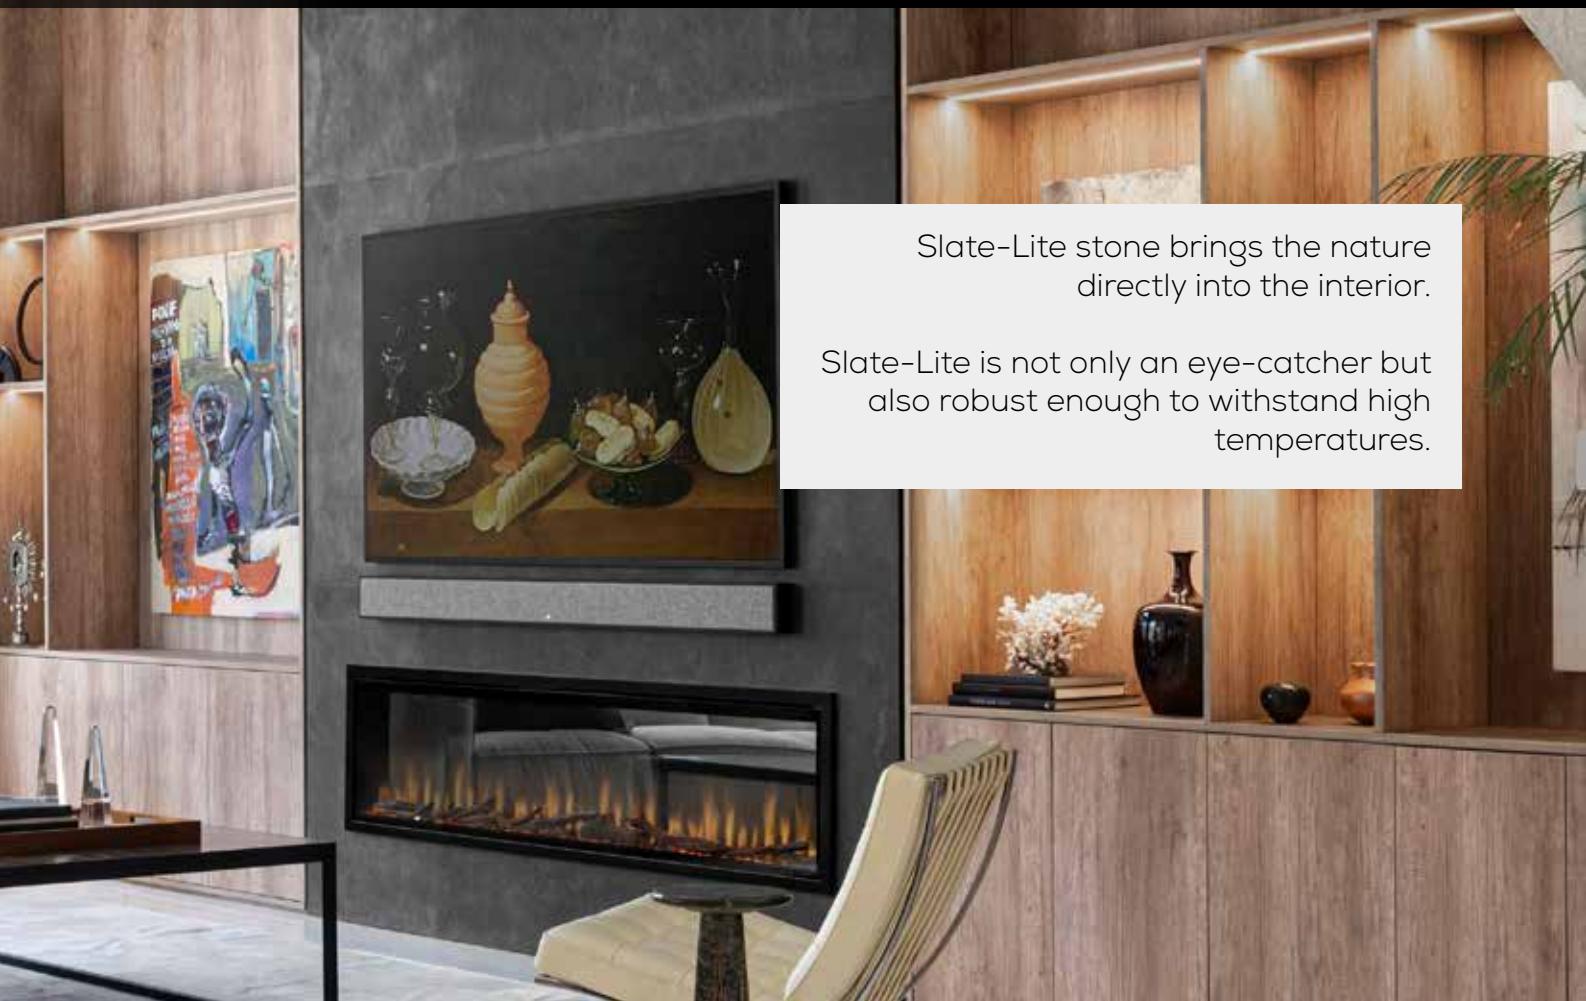

Slate-Lite standardly has the Fire-EU **class Cfl-s1** (according to EN 13501-01 for floor coverings) or **B1** (according to DIN 4102).

Upon request, Slate-Lite is also available in a special composition with the fire class **Cs3d0!**

MODERN FIREPLACES

Fireplace cladding & backsplashes

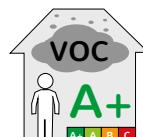

Slate-Lite stone brings the nature directly into the interior.

Slate-Lite is not only an eye-catcher but also robust enough to withstand high temperatures.
